

Founded in 1993, Kiliç Seafood has become one of the world's leading aquaculture brands through its fully integrated production model and sustainable growth strategy. Operating offshore farms in the pristine waters of the Mediterranean, Kiliç delivers premium sea bream, sea bass, and other high-value species to nearly 70 countries worldwide.

Supported by a strong global sales and distribution network, Kiliç Seafood has been recognized as Türkiye's largest exporter in the Seafood and Animal Products category by the Turkish Exporters Assembly (2010–2026).

From sea to table, Kiliç Seafood is committed to quality, sustainability, and excellence at every stage of the value chain.

World leader in the production of Mediterranean Sea Bass and Sea Bream.

Türkiye's largest exporter of Seafood and Fishery, with an export volume of \$409.6 million.

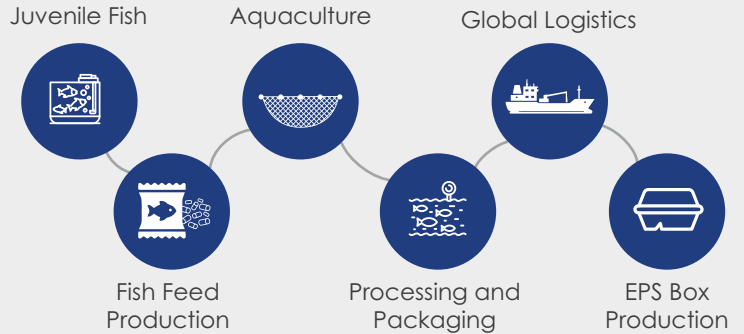

Ranked 89th on the ISO "Türkiye's Top 500 Industrial Enterprises" list.

Fully Integrated Production

Kiliç Seafood manages all stages of production in-house, starting from broodstock and hatchery operations to feed production, offshore farming, processing, packaging, EPS fish box production and logistics.

This integrated structure ensures full traceability, food safety and consistent quality across all products.

Annual production capacity of **110,000 tons of harvested fish.**

Annual production of **607 million juvenile fish.**

Annual fish feed production capacity of 345,000 tons.

Local Facilities

Global Existence

With fully integrated production across Türkiye, international sales offices in Italy, the Netherlands, and the USA, and a juvenile fish production facility in Tunisia, supported by a strong logistics network, Kılıç Seafood delivers high-quality Mediterranean flavors to all corners of the world.

Mediterranean Sea Bass

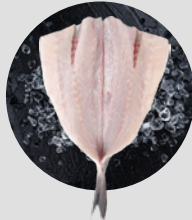

(Dicentrarchus Labrax)

**The most noble flavor
of the Mediterranean.**

Sea Bass is a valuable fish species living in the cool and clear waters of the Mediterranean, recognized by its torpedo-shaped body and large scales. It makes a difference with its full-bodied aroma, firm texture, and lightly salty flavor coming from the sea. Preserving its freshness, natural quality, and high Omega-3 value in every portion, it reaches tables at its best.

Mediterranean Sea Bream

(Sparus Aurata)

**The elegance of the Mediterranean,
the star of your table.**

Raised in the clear and deep waters of the Mediterranean Sea Bream has been one of the indispensable flavors of tables since ancient times. Nourished by the natural minerals of the Mediterranean, Kılıç Mediterranean Sea Bream is a natural part of healthy and balanced nutrition with its high Omega-3 fatty acid and protein content.

Portions

Rainbow Trout

(Oncorhynchus Mykiss)

Trout (*Oncorhynchus mykiss*) is one of the most valued species of cold, pristine freshwater sources, appreciated for its delicate texture and refined white flesh. Offering a light yet nutritious flavor profile, it is naturally rich in protein, Omega-3 fatty acids, and Vitamin B12, securing its place in both traditional cuisine and modern gastronomy.

Its smoked variety is gently cured over oak wood chips, developing a deep, woody aroma that delivers a natural and gourmet flavor experience.

Bluefin Tuna

(Thunnus Thynnus)

The power of the seas, the legend of tables.

Bluefin tuna is a strong-muscled, agile, and resilient species living in the cool and deep waters of the Mediterranean. With its rich Omega-3 fatty acids and high protein content, it is both nutritious and energy-rich.

Kiliç Bluefin Tuna is raised under controlled and sustainable conditions, in harmony with the natural cycle of the Mediterranean. Carefully grown with Kiliç's quality approach, it brings the depth and freshness of the sea to tables in every bite.

Ready to Cook Frozen Products

Enjoying healthy and delicious seafood has never been easier, even with a busy lifestyle. Kılıç Seafood's Practical Flavors series combines the freshest Mediterranean fish with carefully crafted sauces, bringing authentic Mediterranean tastes to tables.

Each frozen meal contains premium fish fillets paired with natural ingredients and no additives, preserving the pure taste of the sea.

Thanks to its special packaging suitable for oven, microwave, or boiling in water, a nutritious and gourmet seafood meal is ready in just 20 minutes.

Private Label

For your private label needs, we offer a wide range of products combined with flexible and advantageous packaging solutions. Our portfolio includes both frozen and fresh seafood products, with packaging options such as modified atmosphere (MAP), vacuum, retail-ready, rider, or carton packaging.

Contact us for more detailed information and customized solutions tailored to your brand.

Our Environmental Sustainability Process

As Kılıç Seafood, we see sustainability not as an obligation, but as our reason for existence. We have adopted as a fundamental principle to give back to nature, people, and the future every value we take from the sea. While protecting today's resources, we work to leave a bluer world to the generations of tomorrow.

Electricity obtained from solar panels is used as an energy source in some of our farms as much as possible. Periodic wastewater analyzes are carried out in all our hatcheries and adaptation facilities in accordance with the legal legislation.

Within of regulations, trix analyzes (The Tropic Index (TRiX) to protect the marine environment more effectively) are carried out regularly every year.

Hazardous wastes at the all facilities are stored in accordance with the legal legislation and sent to licensed recycling companies in periods that will not exceed the legal requirements.

By keeping the environmental compatibility under control with the ozone systems in our extruder fish feed facilities, air emission measurements are made in comformity with the legal legislation.

Following responsible sourcing policies on supply chain to ensure that there is no detrimental impact on endangered species.

We hold all the quality standard certificates for our industry and ISO22000, IFS, BRC, Global GAP certificates as well as Aquaculture Stewardship Council (ASC) certificates.
